WORK EXPERIENCE

UI Developer

03/2023 – Present

Beeone Innovations, Kochi, Kerala, India.

- Implemented industry-standard coding practices, making the code 5X easier to maintain, debug, and read.
- Worked with teams to create responsive and fast-loading web applications.
- Integrated APIs and third-party services for enhanced functionality.
- Developed reusable Vue.js components for efficient development.
- Ensured code quality through version control and code reviews.

Reference – Suresh, Team Lead suresh@techbank.finance

Full stack Engineer

04/2022 – 03/2023

Armino Technologies Pvt Ltd, Calicut, Kerala, India.

- Developed and maintained web applications using Vue.js for the front end and Node.js for the back end.
- Developed a custom report generator, rendering reports on the client-side for cost efficiency.
- Achieved pixel-perfect UIs with 100% accuracy, exceeding expectations.
- Ensured seamless communication between the front-end and back end systems.
- Revamped the UI, significantly enhancing UI/UX.

Web Developer - Internship

11/2021 – 03/2022

Kites Foundation, Kochi, India.

- Developed static websites using HTML, CSS, JavaScript, and Bootstrap, delivering responsive and visually engaging designs.
- Accelerated development by managing both frontend and backend tasks, ensuring seamless integration across the stack.
- Built user-friendly interfaces with a focus on performance and cross-browser compatibility.

PROJECTS

Hotal Booking Web application

Developed an Hotal booking project following the MVC architecture. The primary objective was to deepen understanding of Express.js, MongoDB, and gain basic knowledge of deployment processes in DigitalOcean and Nginx. Stacks & libraries used:

- | | |
|--------------------------------------|----------------|
| • HBS (Handlebars) | • MongoDB |
| • Bootstrap | • DigitalOcean |
| • Express.js | • Nginx |
| • Razorpay – for payment Integration | • Git |

Medical Lab Management Web application

Developed an Medical Lab Mangement project following the MVC architecture. The primary objective was to deepen understanding of Express.js, MongoDB, Chart.js, Highchart and gain basic knowledge of dataset integration processes and deployment in AWS and Nginx.

Stacks & libraries used:

- HBS(Handlebars)
- Bootstrap
- Express.js
- Node.js
- Chart.js
- Highchart
- Mongo DB
- AWS

Car wash CRM

The Car Wash CRM Web Application is a comprehensive platform designed to streamline operations for car wash businesses. It allows for efficient customer management, booking scheduling, and service tracking, providing an intuitive interface for both administrators and staff. With features like customer profiles, service history, and real-time updates, the CRM enhances customer engagement and operational efficiency. The application is accessible via <https://admin.wecarecarwash.in/>, ensuring easy management of day-to-day tasks from any device. Stacks & libraries used:

- Vue.js
- Material UI
- Express.js
- Node.js
- AWS
- Rout53
- Elastic IP
- Twilio – for SMS service
- Git
- Mongo DB
- ALPR - Automatic License Plate Recognition
- EC2
- CloudFront
- Nginx
